

Coverage Possibilities for Life-Changing Therapies

Accessible high-quality coverage and care for cell, gene, and specialty therapies.

 The number of FDA approved cell and gene therapies are increasing. **So should your coverage.**

Employer groups are facing a new challenge: how to offer access to these groundbreaking, life-saving treatments without exposing themselves to overwhelming financial risk. What was once considered impossible to treat or even manage is now a reality for patients, but without the right coverage, employers may find themselves unprepared.

Here's How We're Solving This Challenge

OutcomeRx provides a cost effective coverage solution for break-through treatments and avoidance of catastrophic claims through a simple PEPM model.

Offering Specialized Reinsurance for Self-Funded

Employers looking to provide coverage on future CGT claims, we offer a flexible benefit that **provides:**

Comprehensive Financial Protection

- First-Dollar Coverage
- No Future Lasers
- Mitigates Stop Loss Renewal Increases
- Independent of Stop Loss Carrier

Access to Integrated Care

- Credentialed Centers of Excellence
- Complete Therapy and Administration
- Rare Disease Experienced Patient Navigator
